

DT-102-SS

Stainless Steel Keyboard with Touchpad

iKey has combined the convenience of a touchpad keyboard with the rugged strength of stainless steel in the new DT-102-SS industrial keyboard. Stainless steel is known for its longevity, corrosion resistance and ability to retain strength in extreme temperatures. It's also low-maintenance and easy to clean. Each of these characteristics make stainless steel an excellent material for keyboards used in industrial and food processing applications. The durable DT-102-SS is completely sealed and designed to meet NEMA 4X and IP68 specifications.
