

# When only the best will do.

From standard to custom-designed, iKey's rugged military peripherals are engineered to meet *your* requirements.

*iKey's custom capabilities include laptop OEM keyboards with thin, .400" depths. The top-mounted TMLT-890-OEM (top) meets MIL-STD-461 requirements, while the TMLT-890-TP-OEM (bottom) has an integrated touchpad and FSR pointing device.*

## iKey Offers:

- Fast-tracked full custom development and implementation for OEM or desktop models
- Embedded USB 2.0 hubs for additional functionality
- Multiple LED backlight colors, including NVIS-compatible options
- Choice of pointing sensor, including touchpad, FSR and HulaPoint II™
- Integrated CAC readers to meet security protocols
- MIL-STD-810F specifications including solar radiation, salt fog, vibration and chemical resistance
- Excellent EMI performance for radiated emissions and radiation susceptibility, including 200 volts/meter, MIL-STD-461-RS103, and 25 kV ESD
- Thin, top-mount capability to .400" depth from key top
- Excellent elastomer performance for tactile key feedback
- Fully sealed cases to meet NEMA 4X and IP67 specifications
