

iKey's Industrial Year in Review

It's hard to believe 2009 will soon come to an end. Despite the economic climate, iKey continued to develop new products based on the needs of our customers. Here's a review of the new products we introduced in 2009, and watch what we do in 2010!

Wireless, Intrinsically Safe Keyboards

- First-known, completely sealed intrinsically safe (IS) wireless keyboards on the market.
- Factory Mutual (FM)-approved for Class I, II and III, Division I, Groups C, D, E, F and G.
- No cables or barriers required.
- Models include the DW-5K-IS and the Bluetooth®-compatible BT-87-TP-IS.

Stainless Steel: The DT-102-SS

- Rugged stainless steel keyboard with integrated touchpad.
- Corrosion resistant and easy to clean.
- Completely sealed and designed to meet NEMA 4X and IP68 specifications.
- Will soon be available in a nonincendive model.

For Extreme Temperature Environments: The DU-5K-TPE

- Manufactured with an extended temperature Cirque touchpad that operates in temperatures ranging from -40°C to +70°C.
- Completely sealed and designed to meet NEMA 4X specifications

Panel Mount SlimKey™ Keyboards

- Full-size panel mount keyboards.
- Easily integrate into OEM solutions.
- Completely sealed, liquidproof designs.
- Available with or without integrated pointing devices.
- Models featuring red LED backlighting include the SLP-101, SLP-102 and SLP-102-TP.
- Models without backlighting include the PM-101, PM-102 and PM-102-TP.
