

# iKey's Military Year in Review

It's hard to believe 2009 will soon come to an end. Despite the economic climate, iKey continued to develop new products based on the needs of our customers. Here's a review of the new products we introduced in 2009, and watch what we do in 2010!

## Wearable Keyboard: The AK-39

- Fits easily onto user's forearm.
- Integrated Force Sensing Resistor (FSR) pointing device.
- Designed to meet MIL-461 and NEMA 4X specifications.
- Removable snap-on faceplate.
- Adjustable green backlighting that is also available in a night vision (NVIS) compatible configuration.

## Ultra Compact Mobile Keyboard: The SLK-77-M

- Excellent for vehicles, helicopters, airplanes and ships.
  - Mounting holes built into case.
  - Features red LED backlighting.

## Full Travel Keyboards with Laser-Etched, Customizable Keys

- Includes the FT-86-911-TP and the FT-88-911-TP models.
- Customizable keys can be created in any language layout or for specific customer needs.
- Laser-etched keys improve the strength of red LED backlighting in dimly lit work environments.

## For High EMI Standards: The SLK-80 and the SLK-880-FSR

SLK-80

- Designed to meet MIL-STD-461E (high EMI standards).
- Thin, compact keyboard design in conductive plastic case.
- Submersible versions available.
- Adjustable green backlighting that is also available in a night vision (NVIS) compatible configuration.
- Integrated pointing devices.

SLK-880-FSR
