

SkinnyBoard - Ultra-Thin Keyboard is Quick to Clean

iKey, the world leader in rugged computer peripherals, introduces its latest addition to the innovative SkinnyBoard™ line of keyboards, the SB-101. At less than half an inch in depth, the SB-101's ultra-thin design makes it ideal for use in small spaces, vehicles, forklifts, and rackdrawers. With a fully-sealed polycarbonate case and rubber keypad, the SB-101 is rated NEMA 4X, making it impervious to water, dirt, and corrosive cleaning products.

Austin, TX ([PRWEB](#)) February 16, 2012 -- iKey, the world leader in [rugged computer peripherals](#), introduces its latest addition to the innovative SkinnyBoard™ line of keyboards, the [SB-101](#). At less than half an inch in depth, the SB-101's ultra-thin design makes it ideal for use in small spaces, vehicles, forklifts, and rackdrawers. With a fully-sealed polycarbonate case and rubber keypad, the SB-101 is rated NEMA 4X, making it impervious to water, dirt, and corrosive cleaning products. The SB-101 also features a QuickLock™ key, allowing users to quickly disable the keys and avoid unwanted keystrokes during the cleaning and disinfection process.

“The SB-101 performs well in applications where moisture, cleaning, and durability are primary concerns,” said Jim Mayo, controller. “Even in the harshest of environments, the SB-101 is built to last and the QuickLock™ key saves users time and effort when cleaning.”

Featuring red LED backlit keys and a number keypad, the SB-101 is versatile and can be used at nighttime or in low-light environments. The easy-to-install unit has a USB interface, and is completely plug and-play with no additional drivers or software.

The SB-101's ultra-thin design and cleaning capabilities make it an ideal solution for materials handling, automation, and mobile applications. For added convenience, magnetic mounting options are available.
