

## **iKey Launches Ultra-Compact, Full-Travel, Rugged Keyboards**

Austin, TX, February 02, 2012 --([PR.com](#))-- iKey Ltd, the world leader in premium input devices, is pleased to announce the release of its ultra-compact line of [full-travel keyboards](#). The [WB-86](#) keyboard and [WB-86-TP](#) touchpad keyboard offer users a ruggedized keyboard with a small footprint suited for high data-entry, even in harsh environments. With red LED backlit keys and a laser etched legend, the WB line provides versatility while maintaining the tactile feel of an office-grade keyboard, even in low-light environments.

The WB line is ideal for in-vehicle, material handling, and point-of-sale applications. The WB line can be easily integrated into a 3-piece mobile computer system with iKey's new line of rugged, daylight-readable, touchscreen displays, including the 12.1-inch [IK-FPMT-12-1000](#). Like all of iKey's products, the WB-86 and WB-86-TP are fully sealed to NEMA 4X specifications, ensuring they can withstand dirty, wet and corrosive environments.

“Many of our customers require a rugged keyboard but don't want to sacrifice typing speed or accuracy,” says Dave Huddleston, operations manager. “The WB line was engineered to address these needs, combining the convenience of a compact keyboard sealed to IP65 standards with full-travel key caps.”

The WB-86 and WB-86-TP will be available for demonstrations at Fleet Forum, Feb. 8-10, Bonita Springs, FL. Additional information outlining the features and benefits of the WB-86 can also be viewed on YouTube's [iKeyKeyboard Channel](#).
