## WETKEYS Washable Keyboards and Econo-Keys to offer Deep Discount on Waterproof Keyboard and Mouse Set

Leading Medical Keyboard suppliers partner to help lower the cost of EHR - Electronic Health Records equipment

AUSTIN, TEXAS (May 3, 2011) - Econo-Keys ([www.econo-keys.com](http://www.econo-keys.com)), an innovative manufacturer of sealed, ruggedized keyboards for medical and industrial applications, announced today that it has partnered with WETKEYS Washable Keyboards ([www.wetkeys.com](http://www.wetkeys.com)), a leading supplier of washable computer keyboards, to offer Econo-Keys' high-quality products at a significant discount to hospitals, manufacturing facilities, dental offices and other areas where infection control is a key concern.

For a limited time, WETKEYS.com is able to offer the new [EKFT-108 keyboard and EK-PM-W mouse](#) combination for only \$59.95 – more than \$40 off the regular price.

Studies show that commonly shared keyboards and mice are infectious hazard points that are [difficult to disinfect](#). Bacteria can grow and live on keyboards for over 24 hours, making it easy for them to spread [harmful bacterial infections](#) among users - especially in critical healthcare settings.

To combat this growing problem, Econo-Keys manufactures computer hardware that is completely sealed and waterproof. Econo-Keys' [EKFT-108 keyboard](#) and [EK-PM-W mouse](#) are compatible with hospital-grade disinfectants, and can even be cleaned in a dishwasher.

"We are very excited to be working with Econo-Keys to offer this combo-set at the special promotional price of \$59.95. It's a fantastic savings opportunity for IT buyers to reduce equipment costs," explained WETKEYS director of design, Paul Lawrence. "This [sanitary medical keyboard](#) and mouse set can be used by the healthcare industry to combat [HAIs](#) and lower the overall cost of healthcare."

In addition to its waterproof technology, the Econo-Keys bundle, available for immediate delivery through WETKEYS.com, is unique because of its simple, easy-to-use design. Unlike many sealed keyboards, the EKFT-108 has a full-travel keystroke and feels identical to a standard desktop model. Similarly, the EK-PM mouse has a traditional "click" feel and includes an integrated scroll-wheel.

"As an industry leader, we are excited to have the opportunity through WETKEYS.com to provide our cost-effective waterproof peripherals to more hospitals, clinics and businesses," Kacee Pals, Econo-Keys sales manager, said. "[Infection control](#) is a major concern today, and with the widespread use of innovative technology, we hope to reduce these risks in the future."
