

iKey Industrial Peripherals Applications

Industrial applications require peripherals that can withstand the rigors of dusty, dirty, wash-down environments. iKey's NEMA-rated products stand up to the challenge. Our rugged peripherals are often found in:

- Oil and gas operations
- Food and beverage processing
- Pharmaceutical manufacturing
- Chemical processing
- Industrial automation
- Manufacturing operations

Keyboard and pointing device options include stainless steel cases, intrinsically safe and nonincendive models for hazardous environments, and OEM products that easily integrate into custom projects.
