● FEATURES

- > State of art high performance picture quality design .
- > Analog RGB (x1) / Audio input (x1) ,and Speaker out (x1) .
- > Full CRT multi-sync monitor compatibility .
- > Multi-sync capability up to SXGA resolution @ 75Hz, compatible standard DOS , VGA , SVGA , XGA , and SXGA VESA timing .
- > Expand DOS , VGA, SVGA , XGA , and SXGA to full screen display .
- > True color (16.7M) data processing and display driving .
- > Single control operated & transparent On-Screen-Display (hereafter ‘OSD’) user interface .
- > Full control of all relevant display and interface parameters via OSD .
- > Multi language support .
- > VESA DDC1/2B compliant .
- > Compatible with VESA DPMS power saving modes .
- > From factor : 140mm (L) x 113mm (W) x 16mm (H) .
- > +12VDC single power input : 48 watts AC/DC power adapter recommended .
- > Operating temperature : 5 ~ 35 °C .
- > The 2Watt x 2 ch.@ 8ohms audio .

● GENERAL DESCRIPTION

This Board is an advanced TFT LCD monitor control Board. This design enables a full conventional CRT monitor and audio with a large size active Matrix LCD module. It is suitable for resolution up to SXGA @ 75Hz in all modes, the full display area of the module is used.

The design is implemented as a signal printed circuit board.

This Board is designed to act as a full monitor and audio interface.

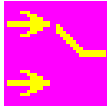

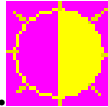

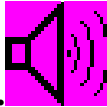

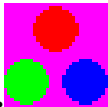

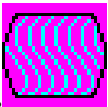

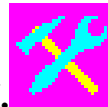

Besides the main functionality of an analog and stereo audio amplifier with one input. This Board is designed to support various TFT LCD under SXGA resolution by BIOS option, customer line-up their monitors with their own identity with following options.

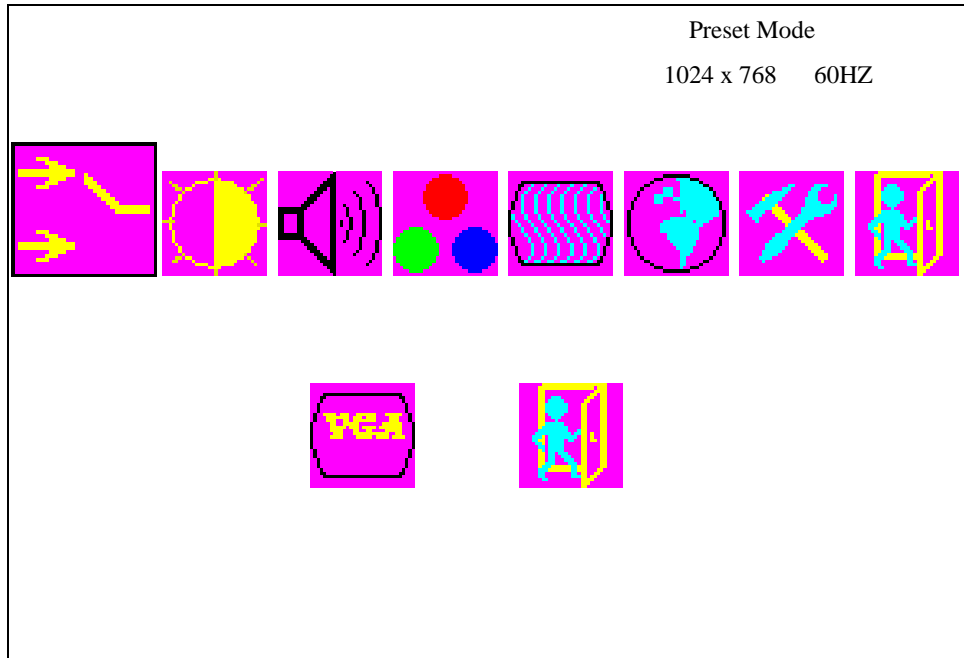

● Package Contents

- > 15” TFT-LCD monitor
- > Adapter & DC Cord
- > AC power cable
- > 15 pin D-sub signal cable

•OSD Function Selection Menu

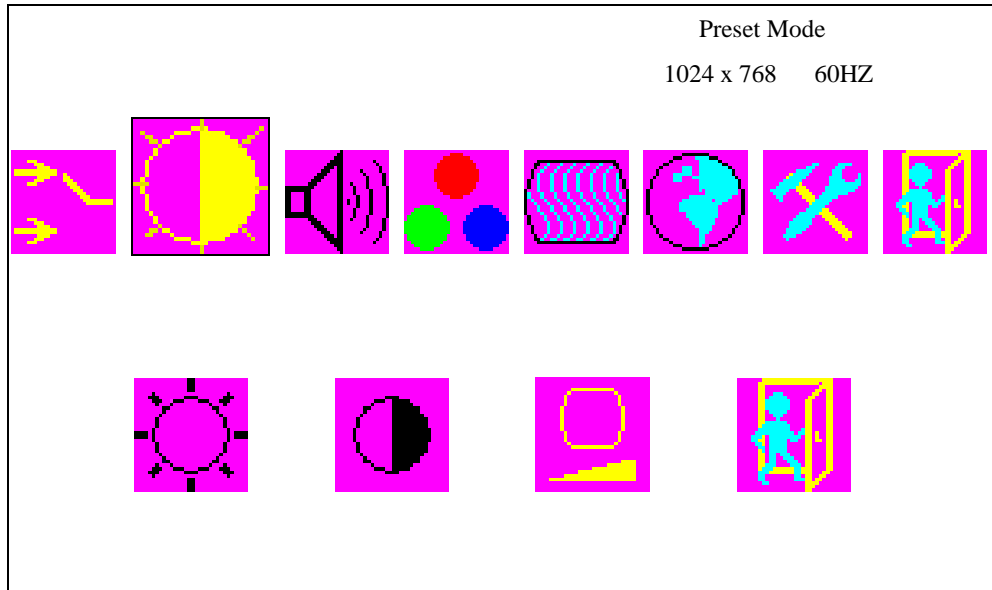

- I.  Signal select
- II.  Video
