

Nobody Does It Tougher

Customized to specific needs

OVERVIEW

Amphenol manufactures custom cables for the defense industry and have various contractors in the United States. Last year one of their military customers approached Amphenol about being provided with customized, durable keyboards. One requirement was a custom Arabic language keyboard.

Challenge

An industrial keyboard with an Arabic overlay.

Solution

iKey keyboards can be quickly customized to specific needs.

Results

Easy to use for employees and easy to integrate into various applications.

SOLUTION

After reviewing several options, Amphenol determined that iKey keyboards were the best choice. Amphenol selected the SLK-880-FSR and the DP-860 due to their customizable, compact and rugged design. The primary requirement of the customization was an Arabic overlay that was ordered directly through iKey.

“The learning process was very straightforward for the customer,” said Rachael Wightman of Amphenol. “I’d recommend iKey to others due to the quality of the product, length of time, lead times, and good pricing.”

iKey is known for its customization of any language a customer needs.

Military applications are unique and some of the necessary equipment must be able to endure a harsh environment. iKey can provide that solution and create a successful work setting.

Real Tough for Real Life.

Amphenol Case Study

theresultscontinued

The SLK-880-FSR exceeds NEMA 4X requirements and is fully submersible, meeting IP68 specifications. This keyboard also features adjustable green backlighting and is also available in a night vision (NVIS) compatible configuration. Another feature is an integrated Force Sensing Resistor pointing device that offers improved sensitivity and increased durability. The SLK-880-FSR has cable strain relief that exceeds 25 pound pull limits and resists drops up to two meters onto concrete.

SLK-880-FSR

DP-860

The second keyboard requested was a DP-860. This compact keyboard is built for versatility and convenience. It is constructed with a sealed, industrial silicone keyboard and is also designed to meet NEMA 4X specifications. Additional features for this keyboard are built-in mounting holes and a lightweight polycarbonate case. The DP-860 is ideal for mobile applications and space saving areas.

"The customer lead us to iKey and we were provided with top quality customer service and products," said Rachael Wightwan of Amphenol. "They showed interest and enthusiasm during the entire process."

About iKey, Ltd.: iKey globally designs and manufactures rugged, sealed keyboards, displays and pointing devices for industrial, public safety, medical and military applications. iKey is known as an innovator of customized industrial keyboards and computer accessories.
